TARUN KUMAR SINHA

Full Stack Developer intern

Location: Greater Noida, UP | **Phone:** +91 7906006910 **Email:**

taruntarun8010@gmail.com **LinkedIn:** linkedin.com/in/tarun-sinha-417391355
GitHub: github.com/taruntarun8010-star

PROFESSIONAL SUMMARY

Analytical Full Stack Developer with expertise in **MERN/PERN** stacks and core programming languages (**C, C++, Python**). Proven track record in developing secure, scalable applications and autonomous AI agents using **Llama** and **LLM** integration. Successfully implemented advanced cryptographic protocols (HMAC-SHA-512) for global technical challenges. IBM Certified AI Developer with a focus on modern AI-driven development and cybersecurity defence.

TECHNICAL SKILLS

- **Languages:** Python (Advanced Recursion), C++, C, JavaScript (ES6+), Java, SQL.
- **Web Technologies:** React.js, Node.js, Express.js, HTML5, CSS3, Tailwind CSS, Bootstrap.
- **Databases:** PostgreSQL, MongoDB, MySQL.
- **AI & Security: GitHub Copilot (AI-Pair Programming)**, LLM Integration (Llama/Gemini), Ollama, HMAC-SHA-512, TOTP (RFC 6238), Kali Linux, Penetration Testing.
- **Tools & Platforms:** Git, GitHub, Docker, Linux/Ubuntu, Postman, Vercel.

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern | Uptricks Services Pvt. Ltd. *Dec 2025 – Feb 2026*

- Engineered responsive web components using **React.js** and optimized backend REST APIs for high-performance data flow.

- Managed scalable database schemas in **PostgreSQL** and **MongoDB**, ensuring 100% data integrity and security.
- Implemented secure user authentication modules and collaborated in an agile team for rapid production-ready deployments.

KEY ACHIEVEMENTS & HACKATHONS

- **HENNGE Admission Challenge 004:** Developed a loop-less recursive Python solution (Mission 1) and a secure TOTP authentication system using SHA-512 (Mission 3).
- **GitHub Copilot Dev Day (Tech4Hack) - April 2026:** Mastered AI-assisted development workflows to accelerate code delivery and improve software quality.
- **Hack The Fall 2025:** Built innovative software prototypes in a high-pressure, 24-hour national hackathon environment.
- **HackIndia & TechStay 2.0 (SRM Ghaziabad):** Selected as a national finalist/participant to develop scalable MVP solutions for real-world problems.
- **Spark 4 Hackathon:** Spearheaded modular code development and technical coordination for cross-functional team projects.

SIGNIFICANT PROJECTS

- **Project JOY (Jarvis):** Architecting a voice-integrated autonomous assistant featuring local LLM processing via Ollama/Llama.
- **The Developers Guild:** Engineered a collaborative web platform for developer networking and technical resource sharing.

EDUCATION & CERTIFICATIONS

- **Bachelor of Computer Applications (BCA):** Accurate Institute of Management and Technology (Affiliated with CCS University) | 2024 – 2027 (Expected).
- **IBM AI Developer Professional Certificate:** Specialized in Generative AI and Autonomous Agent Development.
- **Cybersecurity Alliance 2026 (Gurugram):** Completed advanced technical workshop on network defence and ethical hacking.

- **Academic:** Intermediate (XII) - 2024 | High School (X) - 2022 (U.P. Board).

PERSONAL DETAILS

- **Date of Birth:** May 4, 2006
- **Languages:** English, Hindi
- **Nationality:** Indian
